GREETING CARD MAKING

Objectives:

- To create an innovative idea for the girl students to make greeting card with new design, colorful and attractive.
- To analysis the students creativity, originality and the material used by them to make greeting card.

Brief explanation on the event:

Greeting card making event was decided by the women's council members to conduct for the girl students in IAGI on 17th March 2023 at 12 – 1.30pm, organized by Dr. S. Anu Kiruthika and Dr. Divya. The event started with 33 active participants from Indian Academy Degree College - Autonomous, Indian Academy College of Nursing and Indian Academy School of Management Studies.

Greeting card is a decorated card with a message of good wishes that is sent or given to someone on a special occasion. Greeting is an act of communication in which human beings intentionally make their presence known to each other, to show attention to, and to suggest a type of relationship (usually cordial) or social status (formal or informal) between individuals or groups of people coming in contact with each other. The history of greeting cards from their early Chinese and Egyptian origins to Europe. The history of greeting cards dates back to the ancient Chinese who exchanged messages of goodwill to celebrate a New Year, and to early Egyptians who used papyrus scrolls to send greetings. In

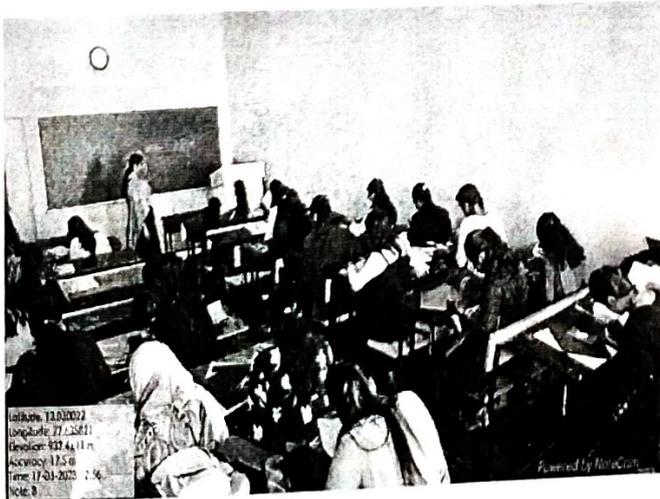

olden days greetings were printed using woodcuts, a relief print-making technique where the artist carved the card's design into a wood-block surface. These cards were used to send New Year's greetings. A short while later, the use of handmade greeting cards started to spread right across Europe. The three important parts of a greeting card are the Design, the editorial message and the materials.
